Being green is part of our philosophy.

That's why our construction process is designed to provide superior quality, whilst sustaining our forests. It all begins with the selection of wood. Large beams are reclaimed from older structures like homes, barns and warehouses throughout South East Asia.

Teak as a renewable resource

Reclaimed teak is the very heart of our business, and we do everything possible to support sustainable forestry and the responsible use of this precious resource.

Craftsmanship

We hand craft everything ourselves, from start to finish. Artisans will work on a single piece at a time focusing their creative energy so that each piece becomes an artful expression of its creator.

Finishing

When the piece is finished it is hand sanded. It then receives 2 coats of French polish before the desired colour is applied. We then use a natural shellac to seal the colour. The piece then receives several coats of natural beeswax before delivery.

Guarantee's

We give a no-quibble money back guarantee on all our pieces irrespective of the age of the piece.

Buy-Back-Policy

We will buy back your furniture at anytime at the price you paid for it, guaranteed.
